Solid Secure Straightforward

Tether's ANPR Solution Improves

Security

Efficiency

Service Levels

License plate recognition (ANPR) has traditionally been costly and only relevant for a limited number of applications.

Innovation with IP cameras allows for wider use of automatic ANPR solutions for a fraction of costs associated with traditional systems.

Tether's ANPR solution is compatible with the most widely used ANPR devices such as Hikvision and Dahua. You simply need a Tetherbox on site. The Tetherbox connects to the ANPR camera (along with your other cameras) and makes it easy to collect and manage license plate information in a safe, secure and compliant manner.

Best of all, the Tetherbox receives over the air updates with newly added features and camera compatibilities.

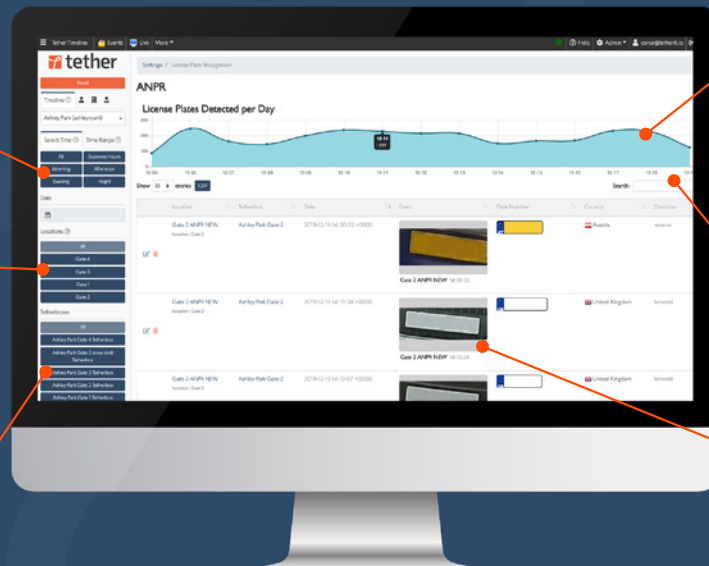

Applications include:

- Police & security
- Parking management
- Toll roads
- Traffic management
- Access control
- Vehicle alerts
