The challenge

Housing associations use video surveillance to monitor premises for anti-social behaviour, security and maintenance purposes.

Housing associations provide homes and support for almost six million people around England. They offer social homes, shared ownership homes, some market homes to rent and buy and essential supported and specialist housing.

They also invest in community services and regeneration, provide support to vulnerable people and reinvest all their income into delivering their social purpose.

Provide reliable and easily accessible recording

Be able to monitor multiple locations from a single access point

Be immune to theft and/or damage

Show clear images

Capture and share criminal activity quickly

Be cost effective

Be easy to use and maintain

Tether's Solutions

Tether caters to Housing Associations needs with a solution that ensures they can demonstrate compliance, bringing together CCTV, IP and serial devices, alarm panels and sensors across sites onto one platform, monitoring the health of the whole surveillance system, providing clear images to deal with anti-social behaviour evidence quickly, and being easy to install and maintain.

- **Cost effective:** Download footage & configure system via internet - no need for costly onsite technician. Integrates with existing systems/cameras.
- **Reliable:** Footage is backed up on cloud server, so no risk of it being lost.
- **Simple to use:** No training needed.
- **Easy access:** Via web: yoursite.tetherit.io. Windows, Mac, iPhone, iPad, Android, etc.

- **Helps site management & reduces site visits:** Catch anti-social behaviour, prevent crime, see property state, etc.
- **Access for Residents:** Easy to give users access & control which area(s) each user can see.
- **Fast incident response:** Find specific events in seconds - no rewinding/fast forwarding for hours unlike other systems
- **Central Control:** Access all locations from a single login.
- **Time-lapse Imaging:** Reviews long events in seconds & gives high resolution images for evidence.
- **Access monitoring:** Audit log to see who has been using the system.
- **Easy set up:** Plug & use installation
- **Local support:** Headquarters in the UK.

Traditional Offerings

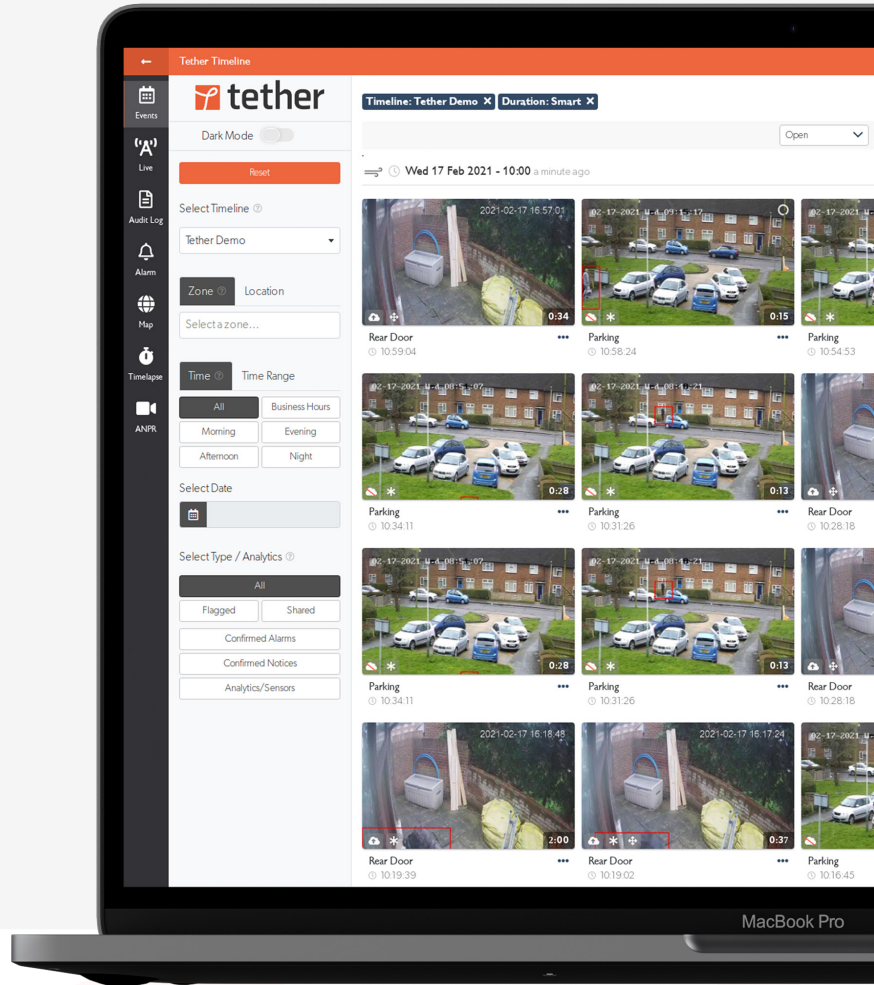

Most systems don't meet Housing Associations needs:

- **Expensive to install/maintain:** engineer visit for every issue, numerous components prone to failure & cumbersome repair.
- **Accessing footage is expensive and takes too long:** a technician must go onsite to retrieve it.
- **Prone to theft/vandalism:** key footage is lost - no backup of recordings means that.

- **Reviewing footage/finding specific event is time consuming:** means rewinding through all footage.
- **Footage is often low quality & gets over-written:** important incidents could be lost.
- **Difficult to use:** requires trained technician to operate.
- **Monitoring multiple sites is time consuming/expensive:** each camera/location must be accessed separately.

Tether Timeline

- Monitor all sites centrally
- Reduce anti-social behaviour through timely responses
- Bring together all legacy devices onto one platform
- GDPR compliant showing commitment to clients
- Maintain good level of security through network and system health monitoring
- Intelligent recording of incidents, with easy to provide legal evidence
- Accessible anywhere
