

One platform. Every device. Every site. One app.

Cameras, access control, alarms and sensors - unified. Find footage in seconds, filter false alerts with smart AI, cut service callouts by 70%.

CONNECT

Every device, every brand

- **Cameras, access, alarms, sensors** - any IP device
- 200+ manufacturers, full ONVIF - mix legacy with new
- ARC and PSIM integrations ready out of the box

MANAGE

Fix it before they call

- Remote firmware and config at scale
- Weekly health reports, fault alerts
- Fix 70% of issues without a site visit

INTELLIGENT NEW

AI that sees and hears what matters

- Detects people through trees, fences and occlusion
- Audio AI picks up glass, shouting, alarms - even off-camera
- Ignores shadows, umbrellas, foliage and glare

TRUSTED BY

DEPLOY YOUR WAY

Your hardware or ours. Cloud when you want it.

- **TetherBox:** silent, low-power, pre-configured hardware from Pi to rackmount - installs in minutes
- **Or your own hardware:** any Intel, AMD or ARM kit you already stock
- **Cloud is optional:** store recordings locally, back up what matters to global datacentres
- **Continuous updates:** new features ship every month, no extra charge
- **Secure:** AES-256, TLS 1.2+, ISO 27001, SOC 2, GDPR

PARTNER ECONOMICS

Recurring revenue, not a one-off.

Every install keeps earning. A typical site - 20 cameras with a handful on cloud - generates a monthly partner margin that compounds with every new site you add.

Bronze, Silver, Gold tiers with up to 40% partner discount, co-marketing, lead share and dedicated integrator support.

WORKS WITH WHAT YOU ALREADY INSTALL

+ 190 more, plus any ONVIF device
